

Quilt Assembly Instructions

- Batting goes down first, then the backing face up, then the front face down.
- Pin together, mark what ever size opening you think the quilt will turn through.
- Stitch around at 1/4" .
- Turn, pin again to hold edges turned and stitch again. We find if the second
- stitching is at 1/2" it looks like binding. On a small quilt that might be too wide.
- On a nicer quilt you will probably want to close the opening by hand.
