

# Binding by Machine

- Measure perimeter, divide by 40, round up and cut that many 2 ¼" strips from straight binding fabric (no curves at center fold)

- Sew pieces together at 45 degree angle and press open

- Fold end at 45 degrees, fold binding in half, then apply binding  $\frac{1}{4}$ " from edge with walking foot, leaving 5 or so inches free

- Stop ¼" from edge, back tack at corner and fold up tail

- Fold down the tail and begin stitching at  $\frac{1}{4}$ "

- Approaching the beginning of your binding, tuck inside the 45 degree fold

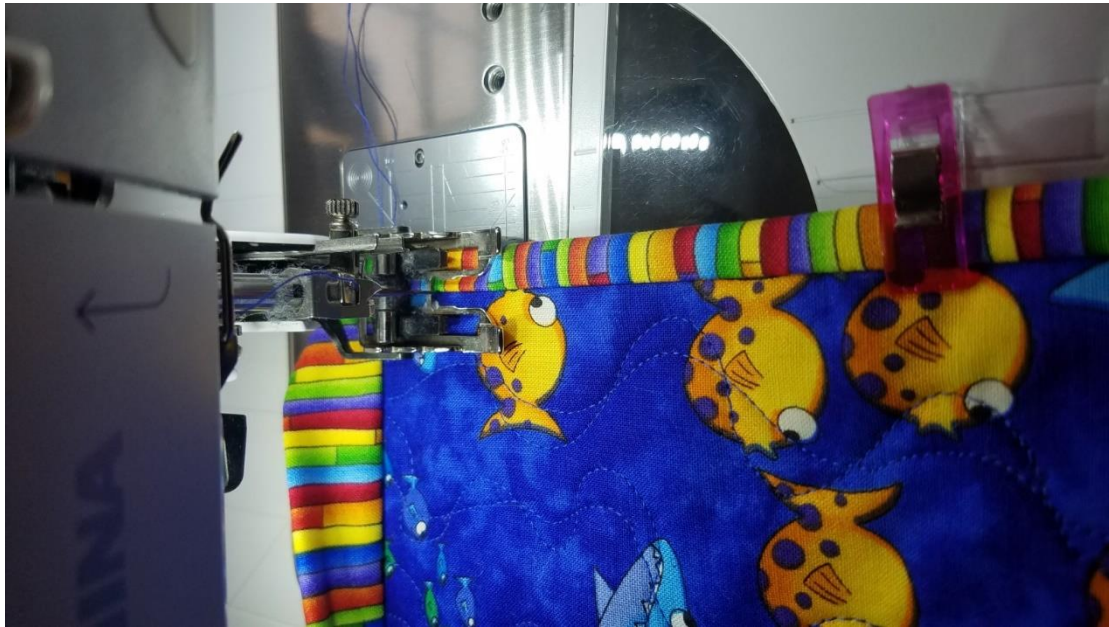

- Trim away batting and backing to  $\frac{1}{4}$ "

- Fold binding to back and clip in place

- Begin stitching in the ditch

- As you approach the corner, fold under binding and clip in place

- Sew around corner and keep going!
